

WILDWOOD

Recycling Grant Provides Optional Larger Recycling Carts

Date of Record: July 23, 2013

Meridian Waste Services, the City's single-family residential hauler of solid waste within Wildwood, has successfully obtained a recycling grant through the St. Louis-Jefferson Solid Waste Management District to provide larger recycling carts to residents. A total of 1,740 carts are now available, with additional carts becoming available in 2014. The grant funds are made available from fees collected, when waste is off-loaded at local landfills. The larger carts are intended to increase the volume of recyclables collected in Wildwood, which is already one of the top recycling communities in the region.

The new carts are 95 gallons in size, compared to the standard 65 gallon carts in use today. If you find the 65 gallon cart to be too small for your weekly recyclables, please call Meridian Waste Services, at (314) 291-3131, and reserve one of the larger recycling carts. Once they become available, Meridian will replace your 65 gallon recycling cart with the new one (the old carts cannot be utilized for anything, but recycling, and will be redistributed to those needing the smaller carts). Since quantities are limited, the larger carts will be provided on a first-come, first-served basis. Also, thanks to all our residents for recycling our waste stream.
