

# WILDWOOD

**Date of Record:** July 8, 2008

In an effort to encourage the testing of private wells within this community, the City of Wildwood is partnering with *St. Louis County Department of Health - Environmental Health Laboratories* in the collection and transportation of drinking water samples. The City will be keeping sample kits at City Hall for residents and, after homeowners collect completed samples, Department of Planning will arrange their transportation to St. Louis County Health Offices in Clayton for testing.

To test the quality of your well water, please complete the following steps:

1. Pick up a sampling kit (including instructional information) at Wildwood City Hall.
2. Collect water sample, as outlined in the instructional form provided with kit.
3. Complete informational form provided with kit.
4. Bring sample, with completed form, to Wildwood City Hall on **Mondays between the hours of 8:00 a.m. and 1:00 p.m.**
  - The City of Wildwood will deliver these kits to St. Louis County on Monday afternoons.
  - *Remember: Samples must be transported within thirty (30) hours of their collection, so be sure to take your collections on Sunday evenings or Monday mornings.*

5. Provide fee of \$15.00 (cash or check) to City of Wildwood at time of drop off (checks must be payable to 'City of Wildwood')

St. Louis County requires two (2) days to complete testing. Results of testing will be mailed from the laboratory to the individual property owner. Please note: St. Louis County recommends well water be tested once a year.

IF YOU HAVE QUESTIONS REGARDING THE WATER COLLECTION PROCESS, OR THE TESTING COMPLETED ON THIS SAMPLE, PLEASE CONTACT THE ENVIRONMENTAL HEALTH LABORATORIES AT ST. LOUIS COUNTY AT (314) 615-8324.
